

DOUBLE-LAYER BELT-TYPE FISH PROCESSING LINE RCF-828

- Model: RCF-828
- Classification: Conveyor Line Series
- Primarily used for cleaning, descaling, and washing products. Raw materials and wastewater are separated, ensuring hygienic operation and easy cleaning. Mainly used in fish fillet processing plants.
- Equipment Configuration:
 - a. The main frame is constructed from 50 × 50 × 2.0 mm stainless steel square tubes.
 - b. Moving components are made of 6–8 mm stainless steel.
 - c. The front and rear main rollers are made of 10 mm thick stainless steel.
 - d. The rear section of the conveyor belt can be lifted for easy cleaning beneath the belt.
 - e. Imported, mildew-resistant sanitary conveyor belts are used.
 - f. The worktables on both sides are made of 2.0 mm thick stainless steel, with a centralized wastewater collection system.
 - g. The upper and lower conveyor belts are equipped with Mitsubishi variable-frequency drive (VFD) motors for adjustable speed control.
 - h. Suitable for simultaneous operation by 10–12 operators, making it ideal for butterfly-cut (open-back) fish processing and fish fillet processing.
 - i. Length: Customizable.
 - j. Power: Customizable.
