

SAUSAGE STUFFER

Jarvis sausage stuffer is a commercial-grade machine used in the meat processing industry for stuffing ground meat into casings to produce sausages of various sizes and shapes. It is designed to handle large quantities of meat and is capable of producing sausages with consistent sizes and weights.

The machine is made of high-quality materials and features a piston that pushes the ground meat through a funnel and into the casing. The machine is efficient, easy to operate, and can help increase productivity in meat processing facilities.
