

OCTOPUS AND SQUID CLEANING MACHINE

RCF-618

Unique fish tank design, adding a fish washing waste sedimentation tank and a water filter tank to ensure long-term operation of the machine, good fish washing effect, low water consumption, and with tank bottom and chain net cleaning functions. It has double side baffles and a tail cylinder lift. Customers can choose to add ice or not according to the actual situation. It is easy to clean, mainly used for cleaning economic products such as fish fillets and shrimp, using a semi-circulating water system, which can ensure thorough cleaning while saving water, and can also be used as an ice machine.

Fish and shrimp washing machine, with automatic fish and shrimp washing functions, equipped with a bottom cleaning system and side pools, can also be used as an ice machine, with water replenishment and circulating water pump to maintain the internal temperature of the pool, ensuring that the single ice hanging thickness can reach about 15%, with consistent thickness, no ice, smooth product, time-saving and labor-saving characteristics.
