

RC HYGIENE CLEANING AND DISINFECTION EQUIPMENT

- The comprehensive industrial sanitation solution adopts diversified design concepts to provide a one-stop solution for cleaning and disinfection. All equipment is made of SUS304 stainless steel, meeting the requirements of GMP/HACCP certification.
- The Sanitation Station is specially designed for labor-intensive food enterprises, featuring fast personnel passing speed and high sanitation and cleanliness.
- The equipment mainly cleans, air-dries, and disinfects the hands of workers in the food factory, cleans the soles, surfaces, and both sides of work boots, and disinfects the soles of the work boots. Workers can enter the food workshop only after completing all the required steps.
- Its functional features are intelligent control, reduced cross-infection and contamination caused by human contact with non-food surfaces, and a standardized personnel cleaning and disinfection process. It not only allows users to adjust the cleaning process according to the degree of dirt but also minimizes energy consumption. The cleaning effect is remarkable.
- The hygienic design and smooth surface allow the brushes to be cleaned and replaced without the use of any tools.
- The combination of modules can be customized according to the different space and needs of customers.
