

HYDRAULIC DEHIDING MACHINE (HYDRAULIC OIL NOT INCLUDED)

Which mainly used to remove skin from cattle carcass, and the skin will be completely removed without being broken, and the machine must be used with an overhead conveyor rail.

- The detailed data as introduction is as follows:
- Working principle: The machine is driven by a hydraulic system, and includes main structure, cylinder, motor, and skin removing roller.
- When the cattle have been fixed in the skin removing position, press the “UP” button, and the skin removing roller will move up to the appointed position for skin removal through hydraulic driving.
- Then, when the cattle carcass has been fixed on the machine, press the “DOWN” button.
- The complete cattle skin will be removed from hind legs to head (the cattle carcass hind legs will be hung on the overhead conveyor rail) through the skin removing roller descending.
- Meanwhile, two workers will use knives to separate the skin from beef when the roller descends

HYDRAULIC DEHIDING MACHINE (HYDRAULIC OIL NOT INCLUDED)

CD Rated voltage	380VAc
Motor rotate speed Cylinder stroke	100~2000R/Min 2200mm
Controll voltage	24VDc
Hydraulic power station	5.5kW
Capacity	30-50cattle/h
Hydraulic pressure station working pressure	: 6.3-8Mpa
Overall size	1500*635*4936mm(L*W*H)
Material	Hot galvanized steel pole stainless steel skin removing roller Stainless steel chain
